Summary

I am a passionate software developer with a Master's in Computer Science and 2+ years of full-stack development experience. I specialize in MEAN and MERN stacks and thrive in collaborative environments, with the aim of contributing to innovative projects and growing my expertise.

Education

Master of Computer Science, Kaveri College of Arts. Science and Commerce June 2021 – May 2023

- CGPA: 8.27/10.0

Bachelor of Computer Science, Kaveri College of Arts. Science and Commerce June 2018 – May 2021

- Percentage: 83.63%

Technical Skills

Programming Languages: C, C++, Java, JavaScript, TypeScript, PHP, Python.

Framework And Libraries: Node.js, Angular, React, Next.js, Ionic, Express.js, Django, CSS, Bootstrap, Material UI, ShadCN UI, Nebular UI.

Databases: PostgreSQL, MySQL, MongoDB, Xano.

Operating System: Windows NT, Linux distributions

Testing techniques: Unit testing (Jasmine, Jest)

Methodologies: Agile, Waterfall

Experience

Junior Software Developer, Application Nexus Web-services Pvt. Ltd. – Pune, India June 2023 – present

Domain Knowledge: Angular, Ionic, React, MongoDB, SQL, Express.js, Node.js, JavaScript.

- Improved and maintained web and mobile applications using Next.js, Angular, Ionic, React, and Node.js, improving user engagement by 25%.
- Optimized database queries and management using MongoDB, PostgreSQL, Xano, and No-SQL, reducing load times by 40%.
- Built and deployed Restful APIs with Express.js and Node.js, handling 100K+ requests daily with 99.9% up time
- Implemented new features in collaboration with cross-functional teams, leading to a 30% increase in feature delivery speed.
- Led code reviews and enforced best practices, reducing production bugs by 35% and improving maintainability.
- Debugged and optimized legacy codebases, improving app performance by 50% and ensuring scalability.
- Gained hands-on experience in full-stack development in MEAN/MERN ecosystems, successfully deploying 5+ large-scale projects.

Full Stack Intern, Application Nexus Web-services Pvt. Ltd. – Pune, India January 2023 – May 2023

Domain Knowledge: Angular, Ionic, React, MongoDB, PostgreSQL, No-SQL, Express.js, Node.js, JavaScript.

- Enhanced and maintained web and mobile applications using Angular, Ionic, React and Node.js, improving user engagement by 30%.
- Optimized database performance for MongoDB, PostgreSQL, and No-SQL, reducing the query execution time by 40%.
- Designed and deployed scalable Restful API using Express.js and Node.js, handling 100K+ requests per day.
- Refactored legacy code bases, increasing app performance by 25% and reducing bug reports by 60
- Led the implementation of new features, contributing to a 15% increase in user retention.
- Gained hands-on experience in full-stack development with MEAN/MERN, delivering 2+ production-ready projects.

Projects

RespondEDU (Education Management Platform)

- Enhanced a full-stack education management system using Angular, Node.js, Xano, and MongoDB, enabling efficient management of assignments, assessments, and teacher-student interactions.

- Built dynamic, responsive web front-end with Angular, optimizing dashboards and content management pages for enhanced user experience across multiple devices.
- Designed and implemented Restful APIs with Node.js and Xano, handling user authentication, course data, and real-time notifications using JWT for secure access.
- **Technologies:** Angular, PostgreSQL, Express.js, Node.js, JavaScript, Typescript, Xano.

Votewise

- Built a data-driven platform to collect, analyze, and visualize voting trends for informed decision making.
- Built scalable APIs with Node.js and MongoDB, ensuring efficient data storage, retrieval, and real-time updates.
- Optimized front-end performance using React and Next.js, enhancing data representation and user interaction.
- **Technologies:** React, MongoDB, Express.js, Node.js, Next.js, Typescript, Shadcn.

Alexsur – Law Firm Management System

- Developed a system to streamline law firm operations, including lawyer, client, clerk, and admin management, case tracking, document storage, billing, and scheduling. The system enables users to assign and manage cases, facilitate secure client-lawyer communication, generate invoices, track billable hours, and schedule hearings, ensuring efficient coordination between stakeholders.
- **Technologies:** Angular, MongoDB(tenant database), Node.js.

Swimming Pool Management System

- Built a system to streamline operations, including member registration, ID card generation, fee receipt management, coach allocation, and schedule tracking. The system allows users to view and manage pool timings, assign coaches, maintain attendance records, and generate reports, ensuring efficient coordination between members, coaches, and administrators.
- **Technologies:** Java, PostgreSQL

Hospital Management system

- Built a Hospital Management System to streamline clinic operations, including doctor appointments, patient registration, medical records management, and client reviews. The system enables efficient scheduling, real-time appointment tracking, patient history management, and feedback collection, improving overall workflow and patient care.
- **Technologies:** Angular, Ionic, PHP, PostgreSQL.

Disney Plus Clone

[Link](#)

- Developed a responsive Disney Plus clone web application featuring dynamic content browsing, movie/TV show previews, and user authentication using Firebase. Implemented Redux for global state management to handle user sessions and real-time updates.
- Integrated a clean UI inspired by the original Disney Plus platform, with categorized sections, banner carousels, and playback previews to enhance user engagement.
- **Technologies:** React, Redux, Firebase Authentication, Firestore, Styled Components.

Technical Highlights

Proficient in front-end development using Angular, React, and Next.js with experience in building responsive and dynamic web applications.

Knowledge of Amazon Web Services (AWS).

Hands-on experience with Firebase for real-time database management, authentication, hosting, and cloud storage.

Skilled in Node.js and Express.js for server-side development, Restful API creation, and microservices architecture.

Experienced in unit testing with Angular using Jasmine and Karma for test-driven development (TDD).

Expertise in modern UI frameworks, including Material Design, Bootstrap, Nebular, ShadCN, and Radix UI.

Proficient in No-SQL databases like MongoDB, including data modeling, indexing, and aggregation.

Expertise in Web deployment using Firebase and AWS.

Course Certifications

- Angular Development with MEAN stack
- Masterclass in C++
